REGISTRATION AND PAYMENT OPTIONS:

Online:

- Register online and pay via PayPal at the conference website: <https://cneha.org/conference.html>

Mail:

- Please send completed form and check or money order payable to “Council for NE Historical Archaeology” to:
Southern Connecticut State University
% William Farley, Department of Anthropology, Engleman C027
501 Crescent Street, New Haven, CT 06515

Please address registration questions to Katharine Reinhart: kreinhart@ahs-inc.com or cneha2024ct@gmail.com.

SOCIAL EVENTS All events except Professional Speed Dating are on Friday, October 18th

Friday Evening Reception

Join us at the New Haven Museum for a cocktail reception and hors’ d’oeuvres on Friday, October 18th - 5:00 - 8:00 pm. Ticket price includes food, two drink tickets (plus a cash bar for additional drinks), and access to the galleries of the New Haven Museum! Located at 114 Whitney Avenue, New Haven, CT, 06510 (~15 minute walk from the Omni, limited on-site parking, street parking available).

Saturday Evening Dinner

Join us at legendary New Haven institution Frank Pepe Pizzeria Napoletana for dinner and drinks on Saturday, October 19th - 6:00 - 8:00 pm. The reception will be held at “The Spot,” home to the original Pepe’s pizza oven, now 99 years old! Ticket price includes pizza, salad, drinks (both alcoholic and non-alcoholic), and pastries provided by Lucibello’s. Max event capacity: 75 participants. Located at 157 Wooster Street, New Haven, CT, 06511 (~15 minute walk from the Omni, street parking available).

Sunday Morning Breakfast, Raffle, and Business Meeting

Join us Sunday for a free catered breakfast at the Omni Hotel. The breakfast will include the annual CNEHA business meeting and the world-famous conference raffle. Raffle tickets will be available to purchase throughout the conference.

Book Room

The CNEHA book room will be open Friday through Sunday at the Omni. Stop by to pick up back issues of the journal, purchase posters from the Telling Time series, or to peruse the book sales. If you are interested in renting a table space at the conference, please contact us at cneha2024ct@gmail.com.

TOUR, WORKSHOP, AND EVENT DESCRIPTIONS

Bones of New Haven

Led by: Dr. Nick Bellantoni (Connecticut Office of State Archaeology)

DESCRIPTION:

Join Dr. Nick Bellantoni, Connecticut State Archaeologist Emeritus, as he discusses his work on funerary archaeology and osteological analysis in New Haven. Topics include (among others) the excavation and analyses of sets of remains uncovered on New Haven Green during the aftermath of Hurricane Sandy, the historic significance of the Grove Street Cemetery, and how interpretations of funerary practice shed light on Connecticut’s history. The morning session will take place at Grove Street Cemetery and an afternoon session will take place on the New Haven Green and at Center Church. All locations are within walking distance of the Omni. Attendees may attend one session or both.

~~Tour of Long Wharf~~—EVENT FULL

~~Led by: Dr. Bruce Clouette (Archaeological and Historical Services, Inc.)~~

DESCRIPTION:

~~Join historian, architectural historian, and industrial archaeologist Dr. Bruce Clouette in a walk along New Haven's historic (and very, very modern!) harbor. Topics of discussion will include the development of industrial New Haven's shoreline, with a particular eye to the contributions of William Lanson, a free black engineer and pillar of New Haven's 19th-century black community, who spearheaded the 1810-1812 extension of Long Wharf as well as the construction of the southern stretches of the Farmington Canal. The morning session will begin at the Omni Hotel with a group walk to Long Wharf.~~

Practical Applications of Macrobotanical Analysis for Beginners

Led by: Katharine Reinhart (Archaeological and Historical Services, Inc.)

Linda Seminario (Heritage Consultants, LLC.)

DESCRIPTION:

Macrobotanical assemblages offer a wealth of archaeological information. Seeds, nuts, and other plant remains help researchers to determine when a site was occupied, how our past peoples interacted with their environment, and even inform us on how they related to others on the landscape or identified themselves. This workshop is meant for students and professionals who are interested in gaining a better understanding of how to apply macrobotanical analysis at historic sites. This workshop will cover practical sampling strategies, macrobotanical analysis and data manipulation methodologies, and applications of primary document research during the interpretation of macrobotanical assemblages. Attendees of this workshop will also be offered the opportunity to gain hands-on experience with the identification of plant taxa commonly recovered in the northeast, sample sorting, the utilization of seed identification resources, and basic assemblage interpretation. Participants will be given an informational packet including information on methodology, data interpretation, macrobotanical identification resources, and botanically-focused primary document research. There will be two sessions, please select only one or select no preference.

Yale Peabody Museum Tours

DESCRIPTION:

The Yale Peabody Museum, one of America's oldest and most storied natural history museums, recently completed a four-year renovation project, with the result of a 50% increase in gallery space, updated interpretations and exhibitions on topics ranging from regional ecology to Assyriology, and a renewed commitment to/focus on community engagement and public access. Join Yale Peabody staff and/or Yale Anthropology students/faculty for a tour of the new "digs" and a discussion of the changing museum landscape. The tour begins at the Yale Peabody within walking distance of the Omni, though the exhibits are open all day long.

Tour of the Henry Whitfield State Museum

Led by: Dr. William Farley (Southern Connecticut State University) **DESCRIPTION:**

The Henry Whitfield State Museum consists of the Henry Whitfield House and surrounding grounds, located in Guilford, Connecticut. The earliest sections of the Whitfield House date back to 1639, making it

the oldest extant Euro-American house in Connecticut. Purchased by the state in 1900 and formally opened as a museum in 1904, the past 120 years of the site's development shed light on evolving practices in museum curation and interpretation. Archaeology has been conducted on the property since at least the 1960s, with excavations performed by avocationalists, museum staff, Connecticut College, Yale University, and, since 2018, Southern Connecticut State University (SCSU). The results of these excavations, particularly those conducted by SCSU, have been incorporated into current museum interpretations and exhibitions which shed light on occupations as recent as the 20th century and as distant as 4000 BP. Furthermore, the archaeological field school has proved a welcome model for public archaeology in a museum setting and placed many students into careers within the world of archaeology. The HWSM is an approximately 20 minute drive from the Omni or is accessible by train. Dr. Farley will reach out to attendees before the conference to help facilitate carpools.

Ground Penetrating Radar Workshop

Led by: Dr. David Leslie (TerraSearch Geophysical, LLC; Heritage Consultants, LLC) DESCRIPTION:

This workshop will provide archaeologists with a hands-on experience of collecting and processing ground penetrating radar data. The workshop is intended for individuals who are interested in GPR applications to archaeological sites. We will survey the New Haven Green (weather permitting), portions of which preserve early historical period burials, 17th to 18th century, and later 18th and 19th century building foundations. The GPR survey will be conducted using several 350 MHz GSSI "Utility Scan" antennas, and an emphasis will be placed on survey parameters (i.e. transect spacing, direction of data collection, algorithmic techniques for data display), so that participants understand the choices faced by a GPR analyst when surveying a site. Following the GPR data collection on the Green, we will travel back to the Omni Hotel, where lunch will be provided. After lunch, we will process and analyze the datasets collected, as well as several other GPR datasets, to provide participants with a wide view of the capabilities of GPR when combined with archaeological projects. Participants will be required to bring a fully charged laptop with a demo copy of RADAN software, and pre-download several data sets for the analysis portion of the workshop. Software and data will be provided one week before the workshop. The workshop runs from 9:00 AM to 3:30 PM - 2.5 hours of fieldwork, 1/2 hour travel time between hotel and site, and back, 1/2 hour for lunch (12:30 to 1:00 PM), and 2.5 hours of data processing

Professional "Speed-Dating" (Saturday, October 19th)

Led by: A group of professional archaeologists in academia, cultural resource management, museum, and government positions.

DESCRIPTION:

For any students or early career professionals looking to explore career paths in the field of archaeology, this workshop will put you in contact with established archaeologists from a range of different sectors to get a variety of perspectives on what a career in archaeology can look like. It will also provide you a great opportunity to practice networking and get any of your questions answered about life as an archaeologist!

The event is free to all. If you are a professional working in any archaeology industry and would like to volunteer to mentor, please sign up.

LENGTH:

4:00 PM to 5:30 PM - hosted at the Omni.
