Briefly, do you perceive a problem with metal detection? If so, what? If not, why?

What are the goals of a regional organization like CNEHA with respect to metal detection: that is, whom should we address, about what?

What is or isn't currently working to achieve these goals?

Should professional or avocational archaeologists work with metal detectorists? Why or why not?

What steps would you like to see CNEHA take and/or support for its members on this issue?
